

COVID-19 Vaccines Now Available

Moderna Updated COVID-19 Vaccine

Important Notice: Please check with your insurance provider to verify coverage for the COVID-19 vaccine.

• AAP COVID-19 Vaccine Recommendations

Who **SHOULD** receive the COVID vaccine?

- **All children age 6 months through age 23 months**, since they are at high risk for severe COVID and hospitalization.
- **Children and teens age 2 years through 18 years with these risk factors:**
 - Health conditions that increase their risk of severe COVID
 - Living in long-term care facilities or other group settings
 - Never having been vaccinated against COVID
 - Having household contacts who are at high risk for severe COVID

Who **CAN** receive the COVID vaccine?

Children age 2 through 18 years without risk factors can get a single dose of the updated COVID vaccine. Talk with your pediatrician.

Ready to schedule?

Call our office to make an appointment or discuss whether the COVID-19 vaccine is right for your child.
