WP3 – PILOT ACTION

Guidelines for Adaptating of the toolkit training content for online course

- **Menu Structure**: Reorganize the menu for each module in a logical and functional way, ensuring the learners have a clear understanding of the content they will encounter.

- **Introduction**: Transform the introduction content of each module into engaging videos (produced by FOAAL and CCIFM) to provide a more dynamic and interactive experience.

- **Menu Pages**: Ensure each menu page presents content in a clear, easily digestible format. Break down the material into smaller, focused sections, each dedicated to a key concept, tool, or practice. This may involve creating new pages to better structure the information.

- **Interactive Learning**: Integrate various media formats (such as videos, infographics, and podcasts) wherever possible to enhance engagement and learning.

- **Assessments**: Include both formative assessments (such as open self-reflection questions) throughout the module, as well as a final quiz to measure overall understanding.

Note: Once the English version is finalized, each partner will adapt the content to their local context and provide translated versions as needed.
